**AccuSource Launches I-9 *Easy* Product Integrated with  
Employment Screening Platform**

Corona, California, October 1, 2007- AccuSource, Inc. announces the launch of its I-9 *Easy* product that streamlines the administration of an employer's I-9 program, verifies employment eligibility through the Department of Homeland Security (DHS) E-Verify system and ensures employers meet state and federal regulations.

The AccuSource I-9 *Easy* product provides a secure, electronic process to a previously labor intensive, paper-based process. This helps employers to maintain compliance, minimize the risk of government penalties and increase control over their I-9 program.

Many employers are already required by federal and state regulations to verify employment eligibility through the DHS E-Verify system, a program that confirms an individual's authorization to work in the United States. Additional, state and federal legislation mandating its use is in process. The AccuSource I-9 *Easy* product provides automated and integrated instant employment eligibility verification through DHS E-Verify.

"AccuSource customers like most employers are concerned about confirming an employee's authorization," said Lianne Charton, President and Chief Operating Officer, AccuSource. "The control and automated capabilities we offer in our I-9 *Easy* product provides our customers with exceptional I-9 program control."

The AccuSource I-9 *Easy* product can be purchased as a stand-alone solution or as a fully integrated product with other AccuSource screening solutions. The I-9 *Easy* product features the following key functionalities and benefits:

- Automates collection and storage of I-9 form; eliminates paper;
- Allows employers to scan and upload supporting documents for electronic storage, keeping all relevant documents in one electronic storage space;

- Eliminates Social Security Administration (SSA) inquiries regarding mismatched Social Security accounts by verifying data upfront through the I-9 process. This will improve the accuracy of employer payroll and tax reporting and virtually eliminate SSA inquiries concerning unmatched Social Security accounts;
- Supports employer compliance with applicable state and federal regulations, thereby reducing legal and financial exposure;
- Organizes information in one secure location and provides single-click access to all employment eligibility information;
- Provides instant employment eligibility verification through DHS E-Verify;
- Provides notifications to facilitate completion of I-9 forms and alert the employer of I-9 maintenance needs
